

# NE&T Infra-Red Type Donnelly Chute Level

## Sensors and Indicating Transmitters

IR SENSOR FOR DONNELLY CHUTE

### SPECIFICATION:

**Material:** Brass

**Threads :** 1.5 BSP

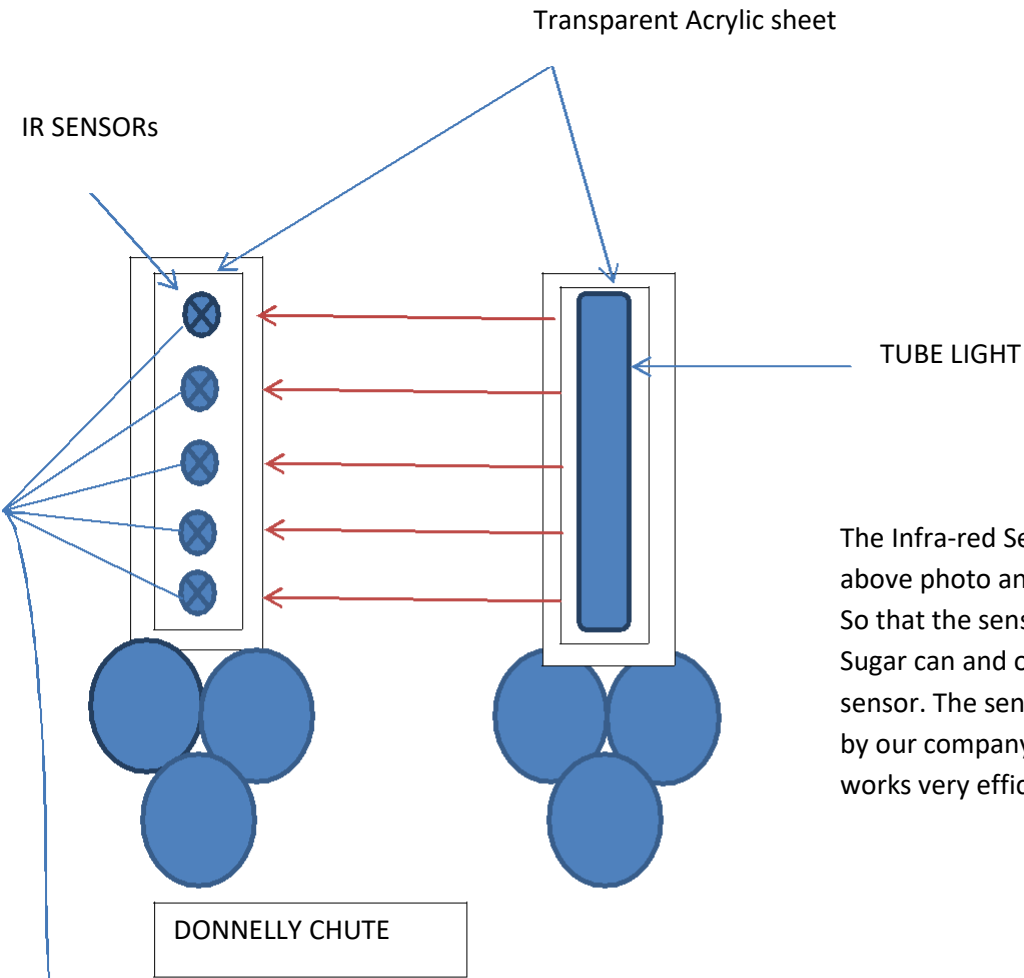

**Día :** 47.8mm

**Length:** 70mm

**Hex :** 50mm

**Sensing Range:** 3 max. Meter distance

**Sensor cable:** 3 meters

The Infra-red Sensor is fitted in the socket as per the above photo and fitted from the back on the acrylic sheet So that the sensor never comes in direct contact with the Sugar can and only the tube light illuminates on the sensor. The sensing power of the infra-red sensor made by our company (NE&T) is very high, which is 4meters, it works very efficiently.
